

**OVER BUILDING OF HOMES IN THE EVERGREEN SPECIFIC
PLAN IS DEFINATELY A MORAL ISSUE:**

I) Land for future High School HAS to be RESERVED

This has become a moral issue for our children's education, as school over-crowdedness is ruining our students lives & families. Over-crowdedness creates bitterness amongst our youth as they face daily treatment of the herd mentality. Did you know that due to the overpopulation of students in EVHS, there was not enough Math Teachers so many students were misplaced in the wrong math classes Alg 2 before they put in Geometry. This caused many students to have flunk out in math & put them a year behind as they Retook the class. And due to student overpopulation at EVHS, there was not an English Teacher (and other teachers) for 2 or 3 months they sat in the cafeteria with no work and/or easy work from various substitute teachers. Often times students missed a lot of points due to lack of assignments, due to the substitutes choosing to not provide value/points on assignment. Well lack of points leads to LOW culmulative points that directly affect their final Grades. The impact of this is that approx. a quarter of the students already flunked the first semester of English and will need to repeat the Entire Class.

These students are who make up our future leaders, our workforce, our society, our country and ultimately our world.

Where is our true leadership? And who is standing by not fighting for what is morally right? Land for future High School HAS to be RESERVED

II) NO Overbuilding of Homes which Creates Overpopulation and more Traffic--

We have to Stop ignoring devastating, psychological affects of this type of pollution. (more traffic in and more traffic out is not the solution)

It is a moral issue to stand back and allow our communities living environment be taken over by traffic & heavily & dense over-population--as this causes our very normal humans to develop psychological pollution. (There was scientific study of many mice put together in a tightly controlled environment where the results were devastating--these mice began to display crazy behavior and started killing each other).

WE REFUSE TO BE MADE LAB RATS AT THE COST OF GREED--The develops win But did It occur to anyone that OUR LIVES HAVE VALUE??

This overwhelming amount of traffic, neighbors are having difficulty getting off there own block for school drop offs and going to work. Heart rates are up, as our neighbors are fearful that one of the hundreds of children may run in front their car. And fearful that a hurried parent may collide into their vehical, I know there must be in our neighborhoods growing road rage & psychological pollution due to this continuing congesting building of homes in a small radius.

We as adults, as a community, as government, as a TRUE LEADERS cannot just stand by and let this happen to people.

I PLEAD TO OUR LEADERS, PLEASE DO NOT ALLOW OUR NEIGHBORS TO BE TURNED INTO THE LAB RAT ENVIRONMENT... DUE TO GREED of a few. Be of good conscience, good vision, and uphold fairness, Please dispises wrong doing? Please help our community, not hurt. I believe in miracles.

Sincerely,

Paula Shelton,

3325 Henriette Court, San Jose, CA 95135 (408) 528-8599.
